Powering Up Core Management: A Hands-On Workshop with Microsoft Power Tools

Interactive full-day workshop designed specifically for Core directors seeking smarter, more efficient ways to manage operations, visualize data, and make data-driven decisions. Through a combination of short presentations and guided hands-on sessions, participants will explore how Microsoft Power Tools (Power BI, Power Automate, and Power Apps) can transform Core facility workflows.

Speaker Bio

Aaron is the Director of Operations, Shared Research Resources at Seattle Children's Research Institute since the program's establishment in 2022. During this time, Aaron has overseen the development, implementation, and growth of core facilities in the genomics, spatial biology, microscopy, histopathology, and behavioral phenotyping fields. Prior to working at SCRI, Aaron was a program coordinator for the bioinformatics core and later all shared research resources at Oregon Health and Science University. Aaron lives in Edmonds, WA with his wife and two sons.
