

Jake Neuman

Business and Finance Student Intern

Colorado State University - Analytical Resource Core

Powering Up Core Management: A Hands-On Workshop with Microsoft Power Tools

Join us for an interactive full-day workshop designed specifically for Core directors seeking smarter, more efficient ways to manage operations, visualize data, and make data-driven decisions. Through a combination of short presentations and guided hands-on sessions, participants will explore how Microsoft Power Tools (Power BI, Power Automate, and Power Apps) can transform Core facility workflows. Bring your laptop!

Speaker Bio

Jake Neuman is a business and finance intern at the Analytical Resources Core (ARC) at Colorado State University, where he supports research operations through data analysis, financial reporting, and process optimization. With a strong background in finance and information systems, Jake plays a key role in streamlining reporting workflows using tools such as Power BI, Power Automate, and SharePoint. He is passionate about leveraging technology to improve research efficiency and support informed decision-making across interdisciplinary teams. Jake is currently pursuing his degree in Finance with a concentration in Investment Analysis and Corporate Finance at CSU.
