

Michael Heinz

**Director Research Operations
GTAC@MGI**

Washington University, St Louis

Career in Cores

Learn about the journey of two core directors who moved their way up to running their facilities and how one decided to make the switch to industry. Find out how it has influenced their leadership styles and the advice they give anyone else thinking of making the same climb.

Speaker Bio

Since joining Washington University in 2002, I have had the honor of working with many phenomenal researchers. These experiences have allowed me to develop understanding and expertise in applying genomic tools to the needs and goals of the research. My experience includes more than a decade in high-throughput PCR and next generation sequencing and more than two decades in microarray. I have more than 10 years of clinical laboratory experience as well, acting as a supervisor for our facility in a CAP/CLIA certified setting. Prior to my tenure at Washington University, I worked in a microarray services laboratory at Incyte Genomics.

2nd annual SC3 Conference, Sept. 30 – Oct. 2, 2025 Pegasus Park in Dallas, TX
